DETAILED ACTION

1. Claims 1, 2, 6-9, 11-13 and 16-59 are pending. Claims 16-43 are still withdrawn from consideration as drawn to a non-elected invention.

2. Newly submitted claims 44-59 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: These claims comprise separate inventions/species.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 44-59 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

3. The amendment filed July 29, 2005 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The proposed material presented from pages 11-13, 20-30, etc. are not supported from the original specification. Applicant's blanket statement that no new matter has been added is not supported by any particular evidence from the original specification for the voluminous proposed additional material to the original specification.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1, 2, 6-9 and 11-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The Examiner does not see where the additional material added to the claims is present from the original application.

Claim Rejections - 35 USC § 103

6. Claims 1, 2, 6-9 and 11-13, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Price.

Applicant is directed towards paragraph 5 of the January 24, 2005 non-final Office Action regarding Price. Applicant's REMARKS have been reviewed, but are not convincing. It is noted that Applicant has not adequately addressed the new subject matter previously objected to. As understood, to use a computer to analyze and compute common knowledge data disclosed would have been obvious to one of ordinary skill in the art. The motivation for having done such would have been to implement common knowledge with computer technology for a more efficient calculation of profits.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
